SUMMARY

Early-career Business Intelligence / Data Analytics professional with hands-on experience in Power BI, DAX, Power Query, SQL, Python, ETL pipelines, data pipelines, KPI dashboards, dashboard development, data visualization, predictive analytics, and reporting & analytics. Skilled in end-to-end BI workflows — from SQL-based data extraction, data transformation, and data preparation to data modeling and interactive dashboards — with project experience in retail and nutrition analytics, forecasting, and cross-functional stakeholder reporting.

260+ menu items analyzed across nutrition metrics • 4 end-to-end analytics projects delivered • 2 data analytics internships/traineeships completed

INTERNSHIP EXPERIENCE

Data Science & Data Analytics Intern — Cognifyz Technologies

2025

Remote

- Implemented SQL queries and SQL-based ETL pipelines to extract, transform, and load data across recurring analytics workflows, replacing manual reporting with automated data flows.
- Analyzed 3 end-to-end business datasets using Python, Pandas, and NumPy, applying root cause analysis to surface KPIs and trends that directly informed stakeholder decisions.
- Applied predictive modeling and machine learning (regression and classification) for forecasting, and prepared dashboard-ready BI reports used across cross-functional collaboration and stakeholder reporting.

Data Science & Analytics Trainee — Simplilearn

2025

Remote

- Developed 4 applied mini-projects using Python, SQL, Power BI, and Tableau, implementing regression, classification, and clustering for business analytics use cases.
- Completed structured training across 5 core BI/ETL domains — ETL, data transformation, data integration, KPI reporting, and business intelligence dashboard development.
- Delivered analytical reports across 4 applied case studies, strengthening stakeholder-focused data storytelling.

PROJECTS

McDonald's Menu Analytics Dashboard — Power BI

[GitHub Repository](#)

Power BI, Power Query, DAX, Data Cleaning, Data Visualization, GitHub

- Designed an interactive Power BI dashboard analyzing McDonald's menu and nutrition dataset across 260+ products, covering category-wise breakdowns and product-level nutrition values.
- Engineered Power Query (ETL) transformations and DAX measures to clean, model, and calculate 5 key nutrition KPIs — calories, protein, sodium, sugar, and fat — across menu categories.
- Published a two-page dashboard (Overview and Menu & Nutrition pages) enabling category-wise and product-wise comparisons, along with the dataset, .pbix file, and a recorded demo on GitHub and LinkedIn.

DataVision — End-to-End Data Analytics Workflow Platform

[GitHub Repository](#)

FastAPI, PostgreSQL, React, TypeScript, Pandas, Scikit-learn

- Architected a full-stack analytics platform automating a 5-stage ETL and analytics workflow — data collection, data cleansing, data integration, analysis, visualization, and AI-generated insights — across 13 data sources, with a PostgreSQL backend.
- Automated an ETL pipeline and data flows for outlier detection and missing-value imputation to improve data quality and data integrity, paired with a dashboarding frontend for business reporting.
- Deployed role-based dashboards with process automation for report scheduling, reducing weekly reporting turnaround time for analysts.

Twitter Sentiment Analysis Web Application

Python, NLP, Streamlit, Twitter API

- Created a real-time sentiment-analysis dashboard on live social data, visualizing trends for faster business response.

CERTIFICATIONS

- Cognifyz Technologies: Data Analytics Internship
- Simplilearn: Data Science & Analytics Program
- View all certificates: [Google Drive Folder](#)

SKILLS

- Business Intelligence & Visualization:** Power BI, DAX, Power Query, Tableau, Advanced Excel, Data Visualization, KPI Dashboards, Dashboard Development
- Data Engineering:** SQL, SQL Queries, ETL, ETL Pipelines, Data Pipelines, Data Transformation, Data Preparation, Data Integration, Data Flows, Process Automation
- Data & Programming:** Python, Pandas, NumPy
- Analytics:** KPI Analysis, Predictive Analytics, Forecasting, Machine Learning, Root Cause Analysis, Business Analytics, Reporting & Analytics
- Data Architecture:** Data Modeling, Data Quality, Data Integrity, Data Governance
- Databases & Tools:** MySQL, PostgreSQL, Git, GitHub, Jupyter Notebook, VS Code
- Soft Skills:** Stakeholder Reporting, Cross-Functional Collaboration, Stakeholder-Focused Data Storytelling
- Languages:** Fluent in English; Native proficiency in Kannada and Telugu

EDUCATION

AMC Engineering College

Bachelor of Engineering (B.E.), Specialization: Computer Science and Data Science
Cumulative CGPA: 7.23 / 10

Bengaluru, India
Graduated 2026
